

File Size (MB) Real Time (s)

1	1.179
5	1.627
10	2.608
20	3.457
50	6.132
100	10.346

The client is requesting the file in segments.

The maximum size of these segments is limited by buffer capacity.

For each segment the client

has to

- 1) send a write request
- 2) wait for server
- 3) read response
- 4) write to file
